

ULTRA TEMP COUPLING INSERTS

BETTER PERFORMANCE—NO TRADE OFFS

Overcome harsh marine environmental factors from below freezing to blistering heat, UV exposure, and the detrimental effects of salt water. Lovejoy's Ultra Temp Coupling Spiders are designed to help outlast anything you have ever tried before.

KEY FEATURES:

- Larger Continuous Temperature Range
- Higher Nominal & Max Torque
- +10% Radial Misalignment
- Superior Hydrolysis Resistance

Note: Lovejoy Ultra Temp spider ratings are for sizes 90-125. Lovejoy standard ratings are for yellow, red, and green polyurethane spiders sizes 19-55. Competitors' ratings include standard catalog red, yellow, and white polyurethane spiders manufactured and sold by two major competitors.
