Hydraulic Pump / Motor Mounts

For well over 100 years, Lovejoy has been the premier manufacturer of flexible drive couplings. Lovejoy Hydraulics Pump / Motor Mounts help power unit designers and fabricators simplify their Power Unit designs. The Pump/Motor Mount, commonly called the "Bell Housing", allows direct mounting of flange mount pumps to NEMA C-Face electric motors. This eliminates the need for coupling guards, foot brackets, shims, risers, and motor mounting plates, and assures accurate shaft alignment. The ease of assembly reduces your power unit fabrication costs.

Lovejoy precision machines each cast aluminum alloy pump/motor mounts to 0.003 inch concentric from the motor pilot to the pump pilot, and the mounting faces parallel to each other and perpendicular to the pilot Centerline within 0.002 inch. This assures accurate shaft alignment, which prolongs bearing, seal and coupling life. This also helps to reduce noise and vibration in the power unit.

Lovejoy Hydraulics offers a full selection of both vertical and horizontal mounting configuration pump/motor mounts in both SAE and Metric pump flanges, and both NEMA and IEC electric motor mounts. For IEC pump/motor mounts, contact Lovejoy Hydraulics Technical Engineering with application requirements. Lovejoy Hydraulic pump/motor mounts are available from stock and can be shipped immediately. In addition, Lovejoy Hydraulics is always willing to review your special mounting requirements with custom mounts.

Lovejoy Hydraulics Cast Aluminum Pump / Motor Mounts are cast from a lightweight, high strength aluminum alloy. For safety, a molded OSHA orange coupling access cover is included with every NEMA mount.

Horizontal Pump / Motor Mounts

Lovejoy Hydraulics Horizontal pump/motor mounts are supplied with a weep hole to drain any pump leakage. Fluid leakage from this hole is a "tell-tale" detection of leaking seals or other areas of concern. Horizontal mounts are available for mounting NEMA C-Face motors in frame sizes 56C to 405TSC for most SAE and Metric 2 and 4 bolt pump flanges. Certain horizontal mounts can be mounted vertically as well by using Vertical Mounting - Installation 1 and a Vertical Mount gasket.

Included Hardware

A Motor Mount kit and Pump Mount kit is included. Each includes all the required bolts and washers to mount the pump and motor to the pump/motor mount. Refer to the BHN Pump/Motor Mount Bolt Torque Table, Chart 1, on page 7 for bolt torque recommendations.

Vertical Pump / Motor Mounts

Lovejoy Hydraulics Vertical pump/motor mounts are a cost-effective, space-saving solution that allows mounting the pump through the tank lid top or from underneath. The pump and mount assembly is enclosed inside the tank, which is a safe, quiet, compact way of mounting the pump/motor assembly. Vertical mounts are available in NEMA C-Face motor frame sizes from 56C to 256TC for most SAE and Metric 2 and 4 bolt pump flanges. Two mounting options are available to give additional flexibility in Vertical Power Unit Design.

Included Hardware

A Motor Mount kit and Pump Mount kit is included. Each includes all the required bolts and washers to mount the pump and motor to the pump/motor mount. The kit does NOT contain hardware required to mount the pump/motor mount to the tank lid top. Refer to the BHN Pump/Motor Mount Bolt Torque Table, Chart 1, on page 7 for bolt torque recommendations.

Pump / Motor Mounts

Horizontal and Vertical Mount

Selection Process / Mount Type - Product Code Breakdown

Horizontal Mount Selection Process

1. Review Charts 2 thru 5 (page 5) to identify the applications pump mounting type and Chart 6 (page 7) to identify the applications motor frame size.
2. Determine: the measurement from the end of the pump shaft to the pump mounting face (not the face of the pump pilot) **ADD** this to the measurement from the end of the motor shaft to the motor mounting face (not the face of the motor pilot) **ADD** a minimum of 1/16 inch (.0625) for shaft separation. The total of these three dimensions will be the minimum pump motor mount **face to face length**.
3. Locate the appropriate Horizontal Mount table (pages 11 thru 17) based on motor frame size used in the application and the minimum face to face length determined in Step 2. If the minimum face to face length is not listed then select the next longer length listed.
4. From the table chosen in Step 3, locate the pump flange /mounting type as determined in Step 1. The right side of this table will have the corresponding Lovejoy Hydraulics UPC associated with the specific mounting type.
5. Check for proper clearance between the mount inner surfaces and the coupling O.D. and O.A.L (dimensions 'Z' and 'CL' in the table). Dimensional data for Lovejoy Hydraulic LH couplings are located in the LH Dimensional Data table on page 22. Other Lovejoy couplings may also be suitable and can be reviewed with your Lovejoy Hydraulics Representative, found on Lovejoy's website at www.lovejoy-inc.com, or contact Lovejoy directly for sizing assistance at 630-852-0500.

Vertical Mount Selection Process

1. Review Charts 2 thru 5 (page 5) to identify the applications pump mounting type and Chart 6 (page 7) to identify the applications motor frame size.
2. Determine: the measurement from the end of the pump shaft to the pump mounting face (not the face of the pump pilot) **ADD** this to the measurement from the end of the motor shaft to the motor mounting face (not the face of the motor pilot) **ADD** a minimum of 1/16 inch (.0625) for shaft separation. The total of these three dimensions will be the minimum pump motor mount face to face length.
3. Determine vertical mounting installation to be used: Installation 1 or 1A (page 9), Installation 2 or Installation 3 (page 10).
4. Locate the appropriate Vertical Mount table (Vertical Mount option pages 11 thru 14 and Vertical Mounts pages 18 thru 21) based on motor frame size used in the application and the minimum face to face length determined in Step 2. If the minimum face to face length is not listed then select the next longer length listed.
5. From the table chosen in Step 3, locate the pump flange /mounting type as determined in Step 1. The right side of this table will have the corresponding Lovejoy Hydraulics UPC associated with the specific mounting type.
6. Check for proper clearance between the mount inner surfaces and the coupling O.D. and O.A.L (dimensions 'Z' and 'CL' in the table). Dimensional data for Lovejoy Hydraulic LH couplings are located in the LH Dimensional Data table on page 22. Other Lovejoy couplings may also be suitable and can be reviewed with your Lovejoy Hydraulics Representative, found on Lovejoy's website at www.lovejoy-inc.com, or contact Lovejoy directly for sizing assistance at 630-852-0500.

NEMA Frame Size 56C - 145TC and 182TC - 256TC Vertical Mounting Option

Installation 1 and 1A allows Horizontal Mounts having the Vertical Mounting Option to be used in a vertical application for pump sizes USA4F17, SAE AA, SAE A, 80 A2/B4 and 80S4. The pump/motor mount is bolted to the top side of the tank lid. **Vertical Mount gasket UPC number 84527105238 needs to be ordered for frame sizes 56C - 145TC and UPC number 84527105239 needs to be ordered for frame sizes 182TC - 256TC.**

A Motor Mount kit and Pump Mount kit is included. Each includes all the required bolts and washers to mount the pump and motor to the pump/motor mount. Refer to the BHN Pump/Motor Mount Bolt Torque Table, Chart 1, on page 7 for bolt torque recommendations.

Installation 1 Frame size: 56C - 145TC Horizontal Mount (Vertical Mounting Option) (HV)

Installation 1A Frame size: 182C - 256TC Horizontal Mount (Vertical Mounting Option) (HV)

NEMA Frame Size 56C - 145TC Vertical Mounting

Installation 2 pertains only to Vertical Mounts for NEMA Frame sizes 56C - 145TC which only bolt to the underside of the tank lid. **No Vertical Mount gasket is required.**

A Motor Mount kit and Pump Mount kit is included. Each includes all the required bolts and washers to mount the pump and motor to the pump/motor mount. Refer to the BHN Pump/Motor Mount Bolt Torque Table, Chart 1, on page 7 for bolt torque recommendations.

NEMA Frame Size 182TC - 256TC Vertical Mounting

Installation 3 pertains only to Vertical Mounts for NEMA frame sizes 182TC - 256TC which only bolt to the top side of the tank lid. **Vertical Mount gasket UPC number 84527105240 is included with pump/motor mount.**

A Motor Mount kit and Pump Mount kit is included. Each includes all the required bolts and washers to mount the pump and motor to the pump/motor mount. The kit does NOT contain hardware required to mount the pump/motor mount to the tank lid top. Refer to the BHN Pump/Motor Mount Bolt Torque Table, Chart 1, on page 7 for bolt torque recommendations.

Note: ■ When referencing the Lovejoy Hydraulics UPC number in this table, include 8452710 as a prefix to the number shown.

Lovejoy Hydraulics LH coupling is designed specifically for hydraulic applications. The shortened overall length allows for easy replacement and has 4 insert durometers available. The LH design also offers more torque capacity when compared to other similar hydraulic couplings.

Features:

- Industry Standard Overall Length
- 4 insert options - resistant to hydraulic fluid, oil, grease, dirt and moisture
- Superior torque capacity verses industry standard design
- Standard spline bores available per SAE specification
- Hubs available in cast or sintered iron
- Fail-safe - performs even if elastomer fails
- No metal to metal contact

Lovejoy offers additional coupling styles that may provided further advantages and can be reviewed with your Lovejoy Sales Representative or found on Lovejoy's website at www.lovejoy-inc.com.

Product Warranty

Lovejoy, Inc. warrants all products it manufactures to be free from defects in material and workmanship at the time of delivery to the purchaser. Defective products may be returned to Lovejoy after inspection by the purchaser and upon receipt from Lovejoy of shipping instructions specific to the defective products authorized by Lovejoy to be returned. Products returned in accordance with the foregoing procedure will be replaced or repaired, at the option of Lovejoy, without charge and returned to the purchaser F.O.B. Downers Grove, Illinois or South Haven, Michigan, depending upon origin of manufacture. In all cases, transportation costs and charges for returned products shall be paid by the purchaser and Lovejoy hereby disclaims all responsibility for any and all such transportation costs and charges.

This warranty is subject to the following LIMITATIONS:

The purchaser's exclusive remedy under this warranty is limited to the repair or replacement of defective products supplied by Lovejoy, as set forth above. LOVEJOY IS NOT RESPONSIBLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE BREACH OF THIS OR ANY OTHER EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE PRODUCTS, WHETHER ARISING IN TORT OR BY CONTRACT. LOVEJOY FURTHER DISCLAIMS ALL LIABILITY FROM PERSONAL INJURY RELATING TO ITS PRODUCTS TO THE EXTENT PERMITTED BY LAW. BY ACCEPTANCE OF ANY OF LOVEJOY'S PRODUCTS, THE PURCHASER ASSUMES ALL LIABILITY FOR THE CONSEQUENCES ARISING FROM THEIR USE OR MISUSE.

This express warranty is the only warranty applicable to this transaction. IT EXCLUDES ALL OTHER EXPRESS ORAL OR WRITTEN WARRANTIES AND ALL WARRANTIES IMPLIED BY LAW WITH RESPECT TO THE PRODUCTS, INCLUDING ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Every claim under this warranty shall be deemed waived by the purchaser unless made in writing within one (1) year of the receipt of the products to which such claim relates. This warranty is void in the event that repairs are made by anyone other than Lovejoy without prior authorization from Lovejoy. No person, firm or corporation is authorized to assume for Lovejoy any other liability in connection with the sale of its products. No person, firm or corporation is authorized to modify or waive the terms of this Warranty unless done in writing and signed by a duly authorized agent of Lovejoy.

Note: Specifications are subject to change without notice, and without liability therefor.
